About Me

- **About me**

My name is Clement and I specialize in web development that utilizes HTML, CSS, Js , ReactJs etc.

I am a highly motivated individual and eternal optimist dedicated to writing clear , concise, robust codes that works. Striving to never stop learning and improving.

When I am not coding, I am surfing the internet looking for new trends in Programming, playing football, or watching interesting movies.

I like to have my perspective and belief system challenged so that I can see the world through new eyes.

Profile

- Experience and dynamic Intermediate Frontend Developer with hands-on experience in crafting engaging and intuitive web applications.
Proficient in a wide range of Frontend technologies including HTML5,CSS3, JavaScript, and popular frameworks/libraries like ReactJS.
Demonstrated ability to design and implement responsive, cross-browser compatible interfaces that enhances user experience and drive engagement.
Skilled in optimizing website performance and ensuring code scalability and maintainability.
Strong problem- solving skills and a collaborative team player with a passion for continuous learning and growth in the rapidly evolving field of web development.
